Вох Ш

The International Searching Authority has determined that this international application contains multiple (groups of) inventions, as follows:

1. Claims 1, 2, 3 (when dependent on 2), 4, 6 (when dependent on 4)

Production of a hole using a pulse length that is longer in a first method step than in one of the last method steps, the laser pulse length being continuously increased.

2. Claims 1+3

Production of a hole using a pulse length that is longer in a first method step than in one of the last method steps, one of the laser pulse lengths used being shorter than 100 ns.

3. Claims 1+4+5, 6-9 (when dependent on 5)

Production of a hole using a pulse length that is longer in a first method step than in one of the last method steps, in a layer system comprising a ceramic layer.

4. Claims 1 + 10, 11 (when dependent on 10), 12 (when dependent on 10)

Production of a hole in a component of a steam turbine by means of method steps in which different pulse lengths are used.

5. Claims 1 + 11, 1 + 12

Production of a hole using a pulse length that is longer in a first method step than in one of the last method steps, when producing or reworking a component.

6. Claims 1 + 13, 16-19

Machining of a component using at least two lasers with different pulse lengths.

7. Claims 1 + 14, 1 + 15

Production of a hole using a pulse length that is longer in a first method step than in one of the last method steps, an external upper region being produced in a first method step.
